SWIM AT HOME™

ENDLESS POOLS®

A Complete Line of Pools to Suit Your Lifestyle.
The inspiration for the Endless Pool arose more than 80 years ago in Arizona. As a boy, my father swam in place against the flow of the irrigation canals that brought Colorado River water to Phoenix. He and I talked for years about building a machine to swim at home – a machine that would simulate open-water swimming in a small space.

I built the first Endless Pool on the pool deck at Columbia University in 1985. Though only a rough prototype, that pool still amazed the swimmers as they realized that you really could swim in place. The benefits of immediate feedback for them and their coaches were clear even then.

The therapeutic uses of the pool were also obvious to us quite early on. My first customer explained to me the benefits of aquatic exercises for people with multiple sclerosis. Later, his neighbor purchased our fourth pool for her rheumatoid arthritis.

More than 20,000 Endless Pools later, those benefits continue and even more have emerged. Along the way, we have evolved our design, catering to our clients’ varied needs and budgets. The pools and fitness systems presented in the following pages can be adapted to any aesthetic preference and can help you meet almost any fitness, wellness, or lifestyle goals. All feature the ease of installation on which we’ve come to pride ourselves.

For my father, swimming in place meant freedom and simplicity. Any one of our Endless Pools can deliver just that – and more – to your home: a compact, personal pool that’s heated to the temperature you select, flexible enough to fit almost anywhere, and durable enough to provide you with many years of health, fitness, and recreation.

Sincerely,

James Murdock
Founder
Endless Pools
When Exercise is a Pleasure, Fitness is Easy

The Endless Pool combines the joy of swimming and aquatic activity with at-home convenience, indoors or out.

Both our Modular Pools and our Single-Shell Fitness Systems can adapt to almost any aesthetic, from farmhouse to penthouse. You’ll be proud to show off your Endless Pool … and the results you get from using it!
MODULAR POOLS

• Compact, modular construction lets you install indoors or out, even in existing spaces. All components fit easily through doors and down stairs.

• Economical to use year-round, thanks to its energy efficient pump and compact structure.

• Beautiful because you determine the aesthetic. Choose from multiple models, with a range of sizes, depths, and numerous finishing options to suit your taste and budget.

Innovative Design to Install Virtually Anywhere

Great for tight outdoor spaces

Fits in cramped basements

Covers control heating costs
SINGLE-SHELL FITNESS SYSTEMS

• Two-in-one design lets you enjoy both a refreshing massage and a fully adjustable swim current for swimming or resistance exercise.

• Easy installation on any sound, level surface. Perfect for outdoors, a converted garage, or new construction.

• Multiple models to fit just about any space.

www.endlesspools.com • 800-732-8660
Our signature pool is so compact that it’s simple to maintain and affordable to heat year-round. Yet its state-of-the-art current makes it feel as long as a river; you can swim ‘endlessly,’ without ever making a flip turn. It’s the biggest pool you’ll ever need.

Install it indoors or out, in your backyard or basement, in a greenhouse or garage, in a courtyard or a corner.

With sizing customizable in 1’ increments, the Endless Pool adapts to your space requirements.

With your choice of swim currents (turn the page for details) you can have exactly the swim experience you want. It’s fully adjustable to meet your goals and those of everyone in your household.
**Original Endless Pool®**

**Specifications:**
- 7’ x 12’ to 10’ x 16’ swimming area
- 39” standard water depth, 45” & 51” optional
- Modular steel construction
- 5-hp, swim current generator with wireless remote control
- 21” x 16” water outlet grill
- Interior return channels and propulsion system
- Reinforced acrylic water flow and conditioning system
- Poolside digital controls
- High-efficiency circulating pump
- Skimmer filter (removable-cartridge type)
- 4-kW electric heater
- 220-volt, 30-amp GFCI power requirement
- Interior pool surface: 2 colors, 10 patterns available

**Options:**
- Manual and automatic retractable security covers
- Synthetic or aluminum coping
- Permawood™ skirting
- Underwater lights
- Hydrotherapy jets
- Full-depth stairs, corner steps
- Swim mirrors
- Underwater treadmill

www.endlesspools.com • 800-732-8660
PERFORMANCE ENDLESS POOL®
Step up to a smoother, more versatile current.

Our Performance current is both smoother and, at its top speed, faster than our Original Endless Pool current. The custom-designed two-propeller system delivers a superior swim current:

**It’s larger.** The system moves more water, requiring a 24”x18” outlet grill – that’s almost 30% larger than in our Original model! The broader, deeper current gives beginners more room to drift.

**It’s faster (or not).** Power it up to its demanding top speed of 1:05/100 yards, or at the push of a button, slow the current down to a gentle pace.

**It’s smoother.** Many swimmers even call it “soft.” We can get technical about the propellers’ counter-rotation and how interior turning vanes calm turbulence, but it all comes down to this – the current just feels better!

A significant step up from our Original current, the Performance Endless Pool offers greater versatility for all.

Whether you’re a strong swimmer or a novice, this pool adapts to where you are now ... and delivers an ideal environment in which to grow your skills and your fitness level.
Performance Endless Pool®
The Performance Endless Pool includes all of the standard features of an Original Endless Pool.

Our Performance Endless Pool also boasts:

- 5-hp, two-propeller swim current generator with wireless remote control
- 24” x 18” water outlet grill - almost 30% larger

All of the same options are available as for the Original Endless Pool (see page 6).
HIGH PERFORMANCE ENDLESS POOL®
The competition-level pool for the competitive athlete.

Launched at the IRONMAN™ World Championship in Kona, our High Performance current maxes out at a competitive :55/100-yard pace.

Utilizing the same dual-propeller system as our Performance model, the High Performance Endless Pool is augmented by a 7.5-hp motor and upgraded pump, both standard. The result is a swim current that’s quieter and more powerful. Think of it as the strong silent type.

Like the ocean currents at Kona, the High Performance current is smooth, clear, robust, and warm. Unlike Kona, you can control the current’s pace with the push of a button.

Every Endless Pool installs indoors or out, can be customized to suit any aesthetic, and has a fully adjustable current for beginning swimmers or light aerobic resistance. But the High Performance model adjusts higher, for a most vigorous challenge!

**Take the Challenge. Call Today.**
**800-732-8660**
Call to Request your FREE Planning Kit!

Our Planning Kit includes: a DVD showing hundreds of installation ideas, planning programming of indoor and outdoor designs, a planning guide, the Endless Pool Options brochure, and a Pool Layout Kit. This comprehensive package will help you plan your Endless Pool installation! Call us today at 1-800-732-8660 to talk to a Design Representative.

High Performance Endless Pool®

The High Performance Endless Pool includes all of the standard features of an Original Endless Pool. Our competition-level current also features:

- 7.5-hp, two-propeller swim current generator with wireless remote control
- 24" x 18" water outlet grill - almost 30% larger
- 220-volt, 50-amp GFCI power requirement

All of the same options are available as for the Original Endless Pool (see page 6).
What makes the Elite Endless Pool so revolutionary? It starts with the construction. A 7.5-hp motor drives two custom-designed propellers, moving more than double the water volume of our powerful Original current system. The propellers’ greater distance from the outlet grill (itself a spacious 24” x 18”) gives the current more time to straighten, so you enjoy an ultra-smooth swim, at speeds up to .51/100-yards.

This is the stroke-training pool that’s installed on the decks of University of Michigan, USC, Harvard, Auburn, Penn State, and SwimMAC Carolina. Now it’s available for residential installation.

Turbulence-free power, high-volume precision … that’s what makes the Elite Endless Pool the choice for top-tier coaches, for great swimmers, and for swimmers who aspire to greatness.

Better Your Personal Best. Call today.
800-732-8660

The perfect coaching pool
Elite Endless Pool®

The Elite Endless Pool includes all of the standard features of an Original Endless Pool.

Our best current is made possible with these upgrades:

- 7.5-hp, two-motor, side-mounted, two-propeller swim current generator with wireless remote control
- 24" x 18" water outlet grill
- Three 59" x 18" stainless steel VGB compliant suction grills
- 220-volt, 50-amp GFCI power requirement
- 8’ to 10’ widths

All of the same options are available as for the Original Endless Pool (see page 6).
DUAL-PROPULSION ENDLESS POOL®

For couples who want to stay fit together, and for families who want more active playtime, the Dual-Propulsion Endless Pool lets you have it all.

With two swim currents, you and a partner can swim or exercise at the same time, each at your own independently controlled speed. Competitive pairs can challenge each other with every swim!

Swim Together, Stay Together. Call today.
800-732-8660

As Seen on TV

NBC’s hit weight-loss show, The Biggest Loser, used a Dual-Propulsion Endless Pool for their contestants. Complete with two hydraulically powered underwater treadmills, the adjustable-speed current delivered a progressively challenging, low-impact workout.

With two stations for side-by-side exercise, the Dual-Propulsion pool delivers the fun and camaraderie of getting fit with a friend!

A swimming machine made for two
Dual-Propulsion Endless Pool®

Specifications:
• 13' x 14' to 16' x 16' swimming area
• 39” standard water depth, 45” & 51” optional
• Modular steel construction
• Two 5-hp swim current generators with wireless remote controls
• 21” x 16” water outlet grills
• Reinforced acrylic water flow and conditioning system
• Poolside digital controls
• High-efficiency circulating pump
• Skimmer filter (removable-cartridge type)
• 4-kW electric heater
• Two 220-volt, 30-amp GFCI power supplies required

Options:
• Manual and automatic retractable security covers
• Synthetic or aluminum coping
• Permawood™ skirting
• Underwater lights
• Hydrotherapy jets
• Full-depth stairs, corner steps
• Swim mirrors
• Underwater treadmill
WATERWELL® THERAPY POOL

If you need the buoyancy of water for exercise or therapy, why should you have to endure long drives to the pool, crowds, the smell of heavy chlorine, and cold water?

The WaterWell is designed specifically to bring the benefits of aquatic fitness into your home. It features:

• An interior bench/workout station
• Full temperature control
• A low-chlorine water-quality system
• Sizing adjustable to provide waist- or chest-deep water
• Hydrotherapy jets (optional)
• An underwater treadmill for low-impact walking, jogging, or running (optional)

A versatile therapy pool for a range of ailments, the WaterWell has the reliable construction of an Endless Pool® without the swim current. With the same modular design, the WaterWell fits almost anywhere, indoors or out, even in existing spaces.

To lose weight, relieve chronic pain and muscle spasms, improve flexibility, and build strength without stressing joints, the WaterWell gives you year-round, at-home convenience.

Treat yourself at home. Call today.
800-732-8660

- Underwater treadmill
- Synthetic or aluminum coping
- Permawood™ skirting
- Underwater lights
- Hydrotherapy jets
- Full-depth stairs, corner steps
ENDLESS POOL FASTLANE®

The Fastlane puts the Endless Pool swim current in any traditional backyard pool.

Without the Fastlane, attempting to swim in a traditional pool is frustrating: five strokes, wall, five strokes, wall…. Flip-turns impede your exercise, endurance training, and even the simple enjoyment of a swimming rhythm.

With the Fastlane, your pool – be it kidney-shaped, freeform, or Grecian – will sport the best swim current available. The current is smooth, generously sized, and fully adjustable with the handy, water-resistant remote.

With Deck-Mount and Wall-Mount options, the Fastlane securely anchors to new and existing pools. All connections and hoses remain hidden beneath the pool deck.

For swimming, exercise, relaxation, or just a new twist to your next round of Marco Polo, let the Fastlane bring new-school functionality to your old-school pool.

Make the ordinary extraordinary. Call today.

800-732-8660

Fun for the entire family
Fastlane® Specifications:

- 35" water depth required
- 2008 VGB Compliant
- 220-volt, 30-amp GFCI power required
- Available in platinum or sapphire
- 5-HP swim current generator
- Acrylic and 316L stainless steel construction
AQUATIC TREADMILLS

Our hydraulic treadmill turns your Endless Pool® into a versatile home gym.

Turn on the swim current to add intensity to your walk, jog, or run; the current’s resistance also helps you develop your core conditioning. Both the treadmill and the current have adjustable speeds to let you tailor and progress your workouts.

The hydraulic treadmill features a spacious 20" wide belt. With its 5-hp motor, it reaches a top speed of 5.5 mph. The handy, water-resistant remote lets you control the power and the speed. A manual treadmill is also available.

Maximize the potential of your Endless Pool. Ask your Design Representative about including a treadmill.

WHY UNDERWATER?

Research shows that, compared to land-based treadmills, underwater treadmills let you:

- Burn more calories.
- Enjoy an increased range of motion.
- Suffer less muscle soreness and joint impact.
- Start rehabilitation exercises earlier so you can recover sooner.

And those rehab exercises can greatly benefit people who are unable to exercise on land, be it due to injury, surgery, arthritis, or other medical conditions.

Take a step in the right direction. Call today.

Recover faster
Treadmill Case Study
Olympic Gold Medalist Alistair Brownlee

From an Achilles tendon tear in February to Olympic Gold in August – that’s the road British triathlete Alistair Brownlee traveled in 2012. And much of that ground was trod on the Endless Pools® underwater treadmill!

“When I tore my Achilles, I thought ‘I’m going to have to do something special to get myself in shape as quickly as I can,’” said Brownlee, the world’s premier triathlete. His physiotherapist, Emma Deakin, had him train on the Endless Pools’ hydraulic treadmill, which allowed him to run in a non-impact environment.

“As soon as I started using the Endless Pool, my Achilles stopped getting stiff. That was a massive, massive benefit,” recalled Brownlee. “The pool made a huge difference.”

In fact, the Endless Pool’s benefits were so great that Deakin had Brownlee continue his aquatic training right up until the Olympics – even after he was cleared to run on dry land.

When it came time to race – just six months from his injury – Brownlee captured the lead after the first lap and never looked back.

Thanks to a relentless work ethic and the unique benefits offered by the Endless Pool, he was able to capture the glory that otherwise may have escaped him.
A beautifully sculpted acrylic spa can turn your home into a year-round oasis. Of course, the Endless Pools Fitness System is so much more than a spa. It lets you swim, exercise, play, and entertain; it’s the perfect fun-and-fitness solution for family, friends, and solo retreats.

Your Endless Pools Fitness System arrives pre-plumbed and ready to install on any sound, level surface: transform your patio, convert your garage into an aquatic escape, or dedicate new construction to your future wellbeing.

Just sink into our ergonomically designed hydromassage seats, and you’re within easy reach of the push-button controls. Turn up the hydrotherapy jets to melt your stress away, or set the mood with the underwater lighting.

With the industry-best Endless Pools swim current, you can enjoy the added versatility of a fitness pool. You can adjust the speed from a gentle breaststroke to a challenging 1:08/100-yard swim pace. For even more exercise flexibility, add our underwater treadmill (see p. 19 for details).

Our SwimCross Exercise System combines a new, jetted resistance current with smart features to deliver a complete fitness program for all ages.

All models boast our sleek, stylish design, featuring durable steel-frame construction under the modern lines of our maintenance-free cabinet. With options such as our 8-speaker Bluetooth music system and aquatic fitness accessories, you can easily make it your own.

Turn the page to start customizing your Endless Pools Fitness System.
Or call 800-732-8660 to learn more.
All Endless Pools Fitness Systems feature:

- The Endless Pools swim current
- Your choice of two shell colors: Alpine White and Ice Gray
- Maintenance-free cabinets
- Eco-friendly UVC and Ozone sanitizers
- Hydrotherapy jet seats
- 2 Illuminated waterfalls
- Poolside LED control panel and auxiliary controls
- Exterior LED Illumination Bar
- CEC-compliant energy efficiency
- 200 square foot filtration area

Our 58”-deep models (52” standard) can be upgraded with our Integrated Treadmill for low-impact walking, jogging, and running.
CHOOSE YOUR MODEL

Our all-in-one system for fitness and hydromassage gives you the utmost versatility for at-home wellness and recreation.

All models feature 3 jetted seats, integrated grab bars, UVC ozone purification, LED lighting, illuminated waterfall, 14-gauge steel frame with ABS base pan and 4kW heater.

ENDLESS POOLS® FITNESS SYSTEMS

E2000: 20' Endless Pools Fitness System
Separate spa and fitness areas enable your family to enjoy up to 34 hydromassage jets at a luxurious 104° while swimming or exercising at a comfortable 84°.

E700: 17' Endless Pools Fitness System
Boasting the largest swim area of any of our models, the 17' model satisfies serious (and tall) swimmers who want to enjoy a post-workout hydromassage with 27 jets.

E500: 15' Endless Pools Fitness System
Enjoy the world-famous Endless Pools swim current! Our entry-level Fitness System boasts two illuminated waterfalls and 27 hydromassage jets.

SWIMCROSS™ EXERCISE SYSTEM

X500: 15' SwimCross Exercise System
Still compact, and with the same fitness capabilities as the X200, the X500 accommodates larger fitness gatherings with 3 seats and 27 hydromassage jets.

X200: 12' SwimCross Exercise System
Our most compact model includes 5 swim jets and a total of 27 hydromassage jets. Our optional Swim Tether and Rowing Kit give you added fitness versatility.

All SwimCross Exercise Systems feature:

- 5 swim jets
- 50” depth
- Built-in anchor for the optional swim tether
- Your choice of two shell colors: Alpine White and Ice Gray
- Maintenance-free cabinets
- Eco-friendly UVC and Ozone sanitizers
- Hydromassage jet seats
- Built-in, full-depth stairs
- 1 Illuminated waterfall
- Poolside LED control panel
- CEC-compliant energy efficiency
- 100 square foot filtration area
MAKE ANY ROOM YOUR POOL ROOM

It’s the most site-friendly pool on the market. With our Modular Pools’ design, all parts fit through doorways and down stairs. The installation possibilities are as ‘endless’ as our swim current!

You can install an Endless Pool in a space as small as 9’ x 15’. Our WaterWell has a footprint as small as 8’ x 9’!

The option for a corner installation gives you even more flexibility. Our low-chlorine water purification keeps the smallest pool rooms smelling fresh, while our secure cover options make controlling humidity a breeze!

Getting started is easy: just choose your location, select your pool, and we’ll build it to your specifications.

SUNROOM
Bathe your pool in natural light for an al fresco feel while still in the safety of your home. During snowfall or by moonlight, the warm water of your Endless Pool feels even more welcoming!

BASEMENT
This surprising location is also surprisingly cost-effective, especially if you already have a concrete floor. Imagine taking a few steps down to your own private swimming grotto!

GARAGE
Move the lawnmower and dusty boxes aside, and you have an accessible, convenient location for your Endless Pool. As with basements, the concrete floor makes an ideal pre-prepped site.
**Endless Pools Fit Almost Anywhere**

The compact Endless Pool installs easily in your backyard, patio, sunroom, basement, or garage.
AN OASIS OUTSIDE YOUR DOOR

A compact Endless Pool can fit in almost any backyard, no matter the size.

Compared to traditional pools, the Endless Pool requires less maintenance, heats more affordably, and preserves more of your property for gardening and other recreation.

BACKYARD
The backyard pool has long been a vital part of the American Dream of homeownership. An Endless Pool lets you realize that dream with more versatility for swimming and exercise as well as a smaller footprint to maximize the rest of your yard.

With its compact size and the ability to super-insulate the cabinet, you can enjoy outdoor swimming in a warm, energy-efficient pool all year round – even in colder climates!

DECK/PATIO
The perfect centerpiece for a new or existing patio, the Endless Pool lets you create an at-home sanctuary for exercise and entertaining.

Its small footprint gives you added versatility. Build a deck around your pool to create an in-ground feel without the cost of excavation. Or recess the pool into a deck and add extra-wide coping to create poolside seating.

PLACEMENT
Adding to the flexibility of our pool, they can be installed above-ground, partially in-ground or fully in-ground.
Designed for Easy Installation

The Original Endless Pool can fit virtually anywhere. The modular panel system can easily be assembled inside or out, and can be installed In-ground, Partially In-ground or Above-ground.

Our Fitness Systems are delivered pre-plumbed and pre-wired and come fully skirted with only minor assembly and electrical work to be completed.

Your first step is to think about the space in your home that could best accommodate your pool. Then give your Design Representative a call at 800-732-8660 and together we can decide which Endless Pool product is right for you.
SWIM AT HOME™

Besides being enjoyable, swimming delivers one of the best workouts available.

• It uses more muscles than any other exercise.
• It develops strength and stamina with no harsh impact on joints or tendons.
• It provides an excellent cardiovascular workout.

In an Endless Pool®, swimming is even better!

• It’s 20-30% more effective as no flip-turns are required.
• You’ll swim against a current adjustable for all ability levels; as you get stronger, just push a button to make the current faster.

See your stroke in real time.

Our mirrors let you monitor and improve your swimming technique. Their real-time feedback is a must for serious swimmers.

• The 2’ x 3’ Floor Mirror shows you your body roll and hand entry.
• Our angled Swim Mirror lets you monitor hand entry and pull-through, as well as shoulder rolls; it also helps you stay centered in the pool.
• The overhead Backstroke Mirror gives you a full-body view of this challenging stroke.

Made from polished stainless steel for safety and durability, the underwater mirrors are easily visible in the smooth, bubble-free Endless Pools swim current.
The No-Fear Pool

The Endless Pool provides an ideal environment for new and inexperienced swimmers.

It’s shallow (water depth ranges from 39” to 51”) so most people can stand with their head above water. For kids, the nearby seats and benches keep safety just steps away.

The adjustable current has entry-level speeds near zero. You’ll get as gentle a swim as you feel comfortable with (and with experience, as challenging a swim as you can handle!).

Plus, the warm water of an Endless Pool helps new swimmers to relax; it’s not easy to feel confident when you’re shivering!

For safety, versatility, and comfort, there’s no better place to learn to swim than an Endless Pool.
THE MIRACLE OF AQUATIC EXERCISE

For people of all ages and abilities, regular aquatic exercise has been proven to:

- Increase flexibility and strengthen muscles
- Relieve the symptoms of many medical conditions
- Improve balance and agility
- Decrease joint swelling and reduce pain
- Permit effective low-impact exercise

There are a few reasons for this. First, water’s buoyancy can reduce your body weight up to 90%, which dramatically reduces tension and eliminates stress on joints and muscles. Second, water’s natural resistance (enhanced with our optional swim current or jets) makes for a sufficiently challenging workout.

Lastly, water temperature can promote healing. The temperature-controlled Endless Pool can be heated to relax muscles and increase blood flow; that’s especially soothing for muscle spasms, back pain, arthritis, or fibromyalgia. Cooler water often provides relief from multiple sclerosis and other ailments.

Feel better at home. Call today.
800-732-8660

Walking and Running
For many people, running — even walking — can be dauntingly painful. Our underwater treadmill allows you to exercise pain free.

Warm Water Therapy
Warm water assists in relaxing muscles and increasing blood flow to injured areas while improving endurance and conditioning.

Adjustable Resistance
The natural resistance of water combined with our swim current will provide you with a challenging workout.

Why Aquatic Therapy Works

The deeper the water, the more buoyant your body becomes. And buoyancy leads to less weight being borne by your ankles, knees, and hips, so those joints experience less pain and stress.

You can customize your Endless Pool’s depth to create your ideal environment for at-home aquatic exercise and therapy. Ask your Endless Pools Design Representative for assistance.
Who recommends aquatic exercise as a safe, low-impact way to gain the benefits of physical activity?

- AARP
- American Diabetes Association
- Arthritis Foundation
- American Chronic Pain Association
- Multiple Sclerosis Association of America
QUALITY MANUFACTURING

Endless Pools stands as the world leader in counter-current swimming technology. Since 1988, Endless Pools has installed more than 20,000 swimming machines in all 50 states and more than 100 countries.

In 2015, Endless Pools joined the Watkins Manufacturing family. The world’s largest manufacturer of hot tubs, Watkins is a part of Masco Corporation, a Fortune 500 company whose family of brands include Delta® faucets, Behr® paint, Kraftmaid® cabinets, and Milgard® windows. The union greatly expands Endless Pools’ ability to create competitively priced swim spas featuring our industry-best swim current.

Endless Pools is headquartered in suburban Philadelphia, PA, with additional facilities in Vista, CA. For more than a quarter century, we’ve worked to make it possible for you to Swim at Home™.
Team Endless Pools

At Endless Pools, we use what we make. For heart health, weight loss, and triathlon training, many of our employees swim daily in the six models available in our suburban Philadelphia Factory Showroom. Some employees even have their own at-home Endless Pools. That gives us first-hand knowledge of the customer experience.

We believe in what we build, and we support what we ship. Every day, we strive to deliver unmatched workmanship, design consultation, and customer service. We know the freedom and joy that comes from the ability to Swim at Home, and we pride ourselves on sharing that experience with you.

Custom Built

You can customize your Endless Pool because we custom-build each one precisely to the customer’s specifications. Our rigorous in-house inspection ensures that your pool arrives as requested and in proper working order.

Energy Efficient

With substantially less water than a traditional pool, the Endless Pool uses less energy for heating and purification. We offer a range of cover options to control heat loss and humidity. Our super-efficient circulating pump requires less energy than a 120-watt bulb!
ENDLESS POOLS® AT A GLANCE

• Convenient year-round access to swimming, exercise, family fun, and spa therapy, all from the comfort of home

• Affordable compared to a traditional pool.

• Energy Efficient using less water, energy, and chemicals

• Versatile for installation indoors or out, in new or existing spaces

• Ideal swim conditions, featuring push-button temperature control and a current that adjusts to suit anyone, from toddlers to triathletes

• 20,000+ installations in over 100 countries

TAKE THE NEXT STEP...

Call an Endless Pools Design Representative.
We’re here to help plan your perfect pool. Our experienced staff of designers, architects, and engineers will guide you every step of the way, from model selection through your first swim! (You can call our Customer Service hotline after that.)

Send us a photo of your proposed pool site, and we can create a realistic rendering of what the space will look like with your dream pool – all tailor-made for your lifestyle, budget, and location.

Try an Endless Pool near you.
Swimming is believing! The best way to experience the Endless Pools swim current is to try a pool in your area. Ask your Design Representative about our nationwide network of demonstration pools or our Philadelphia-area Factory Showroom. Take a swim; we guarantee you’ll love it!

Call 800-732-8660 for a no-commitment next-step today!

Endless Pools is a subsidiary of the Masco Corporation, a Fortune 500 Company.
