Many of our customers choose to enhance their Endless Pool by selecting one or more of our available options. The following pages describe many of the options and how they can complement your pool and swim or exercise experience. Our team of architects and designers can be reached at 800-732-8660 to answer any questions you might have about incorporating these options into your pool.

**Manual Retractable Security Cover**

The Retractable Security Cover acts as a horizontal fence sealing off access to the pool. Indoors the cover controls humidity, while outdoors the cover seals out dirt, leaves and debris. The cover retracts onto a roller at one end of the pool and deploys along low-profile tracks installed on the pool coping. A lock-down mechanism is provided to secure the cover over the pool. The cover meets stringent ASTM F1346 safety standards and is strong enough to support the weight of an adult. The cover is available in light blue, aqua, royal blue, gray, tan, forest green and black. Sample color swatches are available. For safety, outdoor covers require a cover pump that automatically pumps rain water off the top of the cover. Endless Pools strongly recommends a security cover for all installations.

**Size and Depth Options**

When deciding upon a length and width for your pool, you should consider such factors as how you intend to use your pool, the general dimensions of the site, your own height, and additional space requirements for options such as jets, lights and a cover.

**Wider Pools**

Our standard pool is ideal for freestyle swimming but people who swim with a wide kick may benefit from a wider pool. Pools up to 3' wider are offered.

**Longer Pools**

If you want to have more than one person using your pool at the same time, a longer pool is a good idea. We offer pools up to 2' longer.

**Shorter Pools**

Looking to install an Endless Pool into a tight space? A shorter pool may be the answer. One to two feet shorter pools offer the same quality current as our standard pools.

**Deeper Pools**

Our standard 42" high Endless Pool is ideal for swimming and seated water exercises on the perimeter benches. Our optional 48" pool can also accommodate many therapy and aquatic exercise routines, as can our deepest 54" unit. Ceiling height should be considered for above-ground installations. We recommend a deeper pool to accommodate our optional underwater treadmill.

Deeper Pools

### **Below-Deck Automatic Retractable Security Cover**

Our Automatic Retractable Security Cover acts as a horizontal fence keeping children and pets out of the pool while controlling humidity. Operated with the turn of a key, the cover automatically retracts along concealed tracks below the pool deck for convenient access to your pool.

The cover meets stringent ASTM F1346 safety standards; in fact it's capable of supporting the weight of several adults. The cover can be installed with most coping systems. We strongly recommend a security cover for all installations that may be accessible to children, non-swimmers and pets.

Color Choices: Navy, Royal Blue, Light Blue, Turquoise, Green, Tan, Brown, Black, Charcoal, Gray

### **Synthetic Coping**

Our convenient and durable Synthetic Coping offers an attractive, cost-effective method to finish the top edge of your Endless Pool. The 9.75" x 1" thick polymer-resin material is impervious to water and mildew. It needs little maintenance and never requires refinishing. At the front of the pool, our coping system extends an extra 4", providing a 13-3/4" wide surface covering the Water Quality System mounted on the exterior of the front panel.

### **Two Underwater Lights**

Two underwater lights can transform your Endless Pool into a beautifully lighted "waterscape." These low-energy lights are installed by drilling through the pool wall panel using a special tool provided. These holes are fitted with watertight niches that hold a long-life LED bulb. Like jets, lights cannot be retrofitted easily. If you decide on lights, they should be included in your initial order. Access must be maintained to the outside of the pool wall where lights are installed.

**Aluminum Coping**

Our Aluminum Coping offers an easy and durable way to finish the top edge of your Endless Pool. The extruded-aluminum interlocked panels are welded for maximum strength and include prefabricated corners and straight pieces pre-cut to fit your selected pool size. The coping is 1-3/8" thick and 8" wide and comes finished in a sand-textured white that can be painted any color you want. The snap strip can be removed and replaced with an inset of wood, tile, marble or any material you choose. Joints between the adjacent coping pieces are covered with a textured aluminum cover strip. Available with square or mitered corners.

**Wood Receiver Coping**

We developed this cost-effective, extruded-aluminum coping knowing that wood is a popular finishing option with our customers. The Wood Receiver System is finished with multiple coats of a suitable marine varnish. It accommodates standard 2" x 10" cedar, teak, mahogany or redwood, provided by the homeowner.

**Bullnose Coping**

Typically used when the pool is installed fully in-ground, the Bullnose Coping System allows the installer to finish with concrete and/or tile right up to the pool's edge. The Bullnose Coping System acts as both a liner hanger and a finished edge. Supplied in pieces that can be cut to fit a specific pool size, these extrusions are fastened down to the top flange of the pool panels.

**Synthetic Skirting**

Backed with 3/4" of insulation, our synthetic skirting allows homeowners to finish the exposed walls of their above-ground pools. Pieces can be easily trimmed for partially in-ground pools. The maintenance-free, synthetic skirting is available in a slate or mahogany color.

Slate

Mahogany

**Four Hydrotherapy Jets**

The hydrotherapy benefits of the Endless Pool swim current can be supplemented with four concentrated Hydrotherapy Jets. The optional jets are ideal for therapy and relaxation and are most commonly centered over the back bench of the pool. If you want jets they should be ordered with your pool as they are not easily retrofitted. Access must be maintained to the pool wall where jets are installed. The jet pump is generally installed at the front of the pool behind the skirting.

Bull Nose Coping

### **Floor Mirror**

Make your swims more fun and more effective with our underwater floor mirror. Whether you're a beginner or a competitive swimmer, you will benefit from the mirrors' real-time feedback. Monitor your technique, from hand entry to leg position. Stay centered in the pool's current. Maintain proper form: head down, looking right at the mirror. Enjoy a more engaging view to swim longer. The mirrors are manufactured from polished stainless steel (no glass!) for durability and a clear view.

*"In the Endless Pool, when you can see the mirror the best is when your head is at an ideal position, looking straight down, neck extended looking right over that mirror."*

**Dave Marsh,**

Head Coach, 2016 U.S. Olympic Swim Team

### Endless Pools Fit@Home® App

Take your exercise to the next level with our new Endless Pools Fit@Home app/kit. The app allows you to control the pace and duration of your Endless Pool using any smart device. The app also acts as a smart display allowing you to see your swim speed and duration while in the pool. To use the Endless Pools Fit@Home app with your pool, you should include our Programmable Controller Kit with your order.

### Swim Pace Display

Easy to read — even with swim goggles — the 7" high visibility display presents the pace of the swimmer in minutes:seconds per 100 yards or 100 meters. It's perfect for interval training or to monitor improvements in swim technique. Simply set the pace and swim for as long as you like.

### Swim Communicator

The Swim Communicator instantly transmits audio from any Bluetooth-enabled smartphone to the swimmer via a receiver attached to their goggles. Use it to enjoy music, podcasts, and other smartphone audio while swimming. Or use your device's microphone for a revolutionary coaching aid that relays real-time voice instructions from coach to swimmer.

### Aqua Bike

Take a spin on this stationary bike designed expressly for underwater use. You'll enjoy a low-impact workout that's every bit as effective for weight loss, heart health, and strength building. Sturdy yet lightweight, the Aqua Bike features padded pedals for barefoot use and five adjustment points for a perfect fit.

### Underwater Swim Mirror

The Underwater Swim Mirror helps improve your stroke by providing instant feedback. The mirror is a must for serious swimmers. It lets you monitor each hand entry and pull-through, as well as shoulder rolls. You can also watch your underwater exhalation. The Swim Mirror is mounted on a convenient angle at the front of the pool and provides a unique view of your swim technique!

### Underwater Running Pad

Designed for vertical exercise, the Running Pad allows you to walk, run or do other vertical exercises in your pool and avoids excessive wear and tear on your liner. Use the swim current for additional resistance, core strengthening and a total body workout.

### Remote Pool Monitoring System

Remotely adjust your pool or swim spa from anywhere in the world! With the in.touch™ module installed, you can control water temperature, lights, and jets via your smartphone or tablet.

### Waterproof Bluetooth Speaker

Listen to your music while exercising on our aquatic treadmill or while relaxing in the Hydrotherapy Jets. Our Waterproof Bluetooth Speaker is designed to protect against water immersion but is not intended for underwater use. For music while swimming, we recommend the Finis SwiMP3 player.

### SwiMP3 Player

Listen to music while you swim! When the device is placed on any bones of the skull, the revolutionary SwiMP3 vibrates the fluid in the inner ear resulting in unprecedented sound quality. Bone conduction is a safe, well-established hearing mechanism that the SwiMP3 leverages to enhance aquatic activity.

Aquatic Exercise Step

### Aquatic Exercise Step

The Aquatic Exercise Step is built for water aerobics in your Endless Pool. With its non-skid surface and rubber-edged base, it is the safest and most effective step available for water exercise.

### Child Alarm

The Child Alarm floats on the pool surface and emits a loud warning sound up to 200 feet both in your pool and in your house should someone accidentally fall into the water. When properly used, this alarm will warn you if a child, animal or adult falls into or enters your pool while it is unsupervised. The alarm does not replace careful surveillance, but does offer an added measure of protection.

An electronic, solid state remote receiver is included. This FCC-approved device has an on/off switch with an "on" indicator light and is powered by a 120 volt A.C. wall transformer. The Child Alarm meets the requirements of ASTM Standard F 2208

SwiMP3 Player

### Exterior Stairs

We offer lightweight yet extremely durable stairs with two, three or four risers.

The 2 tier steps are 36" wide and 23" deep with 7.5" risers. Capable of supporting up to 300 lbs. they are easy to assemble and give a finished look to any pool.

Our 3 and 4 tier stairs offer integrated handrails to ease entry to, and exit from, your Endless Pool. These stairs are 36" wide with 8" risers and 12" treads. With a capacity of 400 pounds the stairs are attractive, durable and non-slip.

Child Alarm

Exterior Stairs

## Underwater Treadmills

Turn your Endless Pool into a complete home gym with the addition of an Underwater Treadmill. Use the treadmill with or without the swim current to vary the intensity of your walk or jog. Take it to the next step and use the Underwater Treadmill to cross-train in the Endless Pool. Alternate between swimming and walking or jogging to get a full body workout!

Our manual Underwater Treadmill offers a wide belt for walking or running. You expend as much or as little effort as desired and still achieve a great cardio workout. The powered Underwater Treadmill offers the same wide belt and is activated with a remote control or our Fit@Home app and is fully adjustable up to 5.5 mph.

Underwater Treadmills are typically installed in pools with deeper panels. For placement options and additional information, please contact your design professional.

### Interior Stairs

The Interior Stairs provide added stability when entering and exiting our pools. We offer 3- or 5-tread models to suit every pool depth, with or without the optional Bench Risers.

5-Tread Stairs are suitable for 54"-depth pools only. For the Elite and Dual-Propulsion pools, the 5-tread stairs can be positioned at the back or on the sides. For all other pools, the 5-tread stairs must be positioned at the back of the pool.

For exceptional traction and comfort, each step features SwimDek strips. SwimDek is a cushioned, high-grip material patented for aquatic environments. The SwimDek strips will be Black on White (if you choose Platinum benches) or Gray on White (for Sapphire).

Interior Stairs

### Corner Step

The Corner Step makes entry into and exit from the pool easier. It provides an intermediate step between the underwater channel and the coping. The step can be installed in any of the four corners of the pool. The step material will match your choice of return channels.

For exceptional traction and comfort, each step features SwimDek strips. SwimDek is a cushioned, high-grip material patented for aquatic environments. The SwimDek strips will be Black on White (if you choose Platinum benches) or Gray on White (for Sapphire).

### Coping Rail

Designed with a smaller footprint, 3.5" by 3", our Coping Rail is ideally suited for more narrow coping systems. Constructed from stainless steel, the Coping Rail measures 12" high with a grab area measuring 12" by 16". The Coping Rail provides added assistance and safety when entering or exiting your Endless Pool.

### Spa Rail

The stainless steel Spa Rail provides assistance entering or exiting the pool while minimizing the projection into the swimming area. Rails are most helpful for fully or partially in-ground Endless Pool installations. The Spa Rail may be used with the Corner Step, available separately. The Spa Rail is available in satin finish stainless steel.

### Hand Rail

The Hand Rail provides greater stability by guiding the swimmer from deck/coping level to the pool floor of the standard pool. Rails are most helpful for fully in-ground Endless Pool installations. The Hand Rail, longer than the Spa Rail, is included with the Interior Stairs.

### 3-Foot Stainless Steel Grab Bar

Grab Bars inside the perimeter of the Endless Pool provide an extra measure of security and are useful for a variety of exercise and therapy routines. The 3-Foot Stainless Steel Grab Bar is not recommended for installations with optional Bullnose Coping.

Spa Rail

8 0 0 - 7 3 2 - 8 6 6 0

### Pool Liners

The interior of your Endless Pool can be finished in a variety of aquatic tones to suit your decor. Each liner comes with a 10-year warranty against manufacturer defects. In fact, we're so confident in our liners and how easy they are to install, that should one become damaged during installation, we'll REPLACE IT FREE OF CHARGE. With extra durability built right in, our custom liners give you the design flexibility and peace of mind not found in any other counter-current machine.

### Our Standard Colors

A choice of Light Blue or Dark Blue liners is standard with your Endless Pool.

### New Patterned Liners

Now you can finish your Endless Pool with our unique selection of high quality patterned liners, with or without tile edging.

Light Blue

Dark Blue

NOTE: Liner seams may be more visible on patterns printed on white vinyl. Pattern and solid colors may vary slightly from brochure. Liner choices are subject to change without notice; please contact your Design Representative for all of the latest custom liner choices.

**Complete Pool Packages**

**Save over 20%** on all included options when you choose one of our three Pool Packages. Just select the Package that best suits your goals and lifestyle. It makes ordering a breeze and delivers guaranteed savings!

Packages give you everything you need for a fully finished pool.

**CLASSIC**  
All the essentials

Original Endless Pool

- 7' x 14'
- 42" Deep
- Synthetic Coping
- PermaWood® Skirting
- Manual Retractable Security Cover
- Tension Straps with Leveling System
- UV Water Purifier
- Endless Pools Fit@Home Controller App
- Underwater LED Lights
- Step/Riser

**PERFORMANCE**  
Smoother, upgraded current

Performance Endless Pool

- 7' x 14'
- 48" Deep
- Synthetic Coping
